

I'm using visual studio code because its simple and easy to use

These are mac commands

My favourite commands are

- Cmd + p (quick search a file by name in the folder)
- Control + ~ (it will open terminal in the current folder)
- Cmd + r (replace)
- Cmd + f (find)
- The above are common commands but very useful
- Shift + cmd + p (command palette which is used to beautifier (to beautify html and css))
- Cmd + / (comment the line)
- Cmd + d (replace all the same values at a time)
- Ctrl + r (for recent files)
- Shift + cmd + up arrow(selects entire text above)
- Shift + cmd + down arrow(selects entire text above)
